Alpharetta, GA

Phone: (770) 366-9719 | Email: [indigo.crandell@gmail.com](mailto:indigo.crandell@gmail.com)

LinkedIn: <https://www.linkedin.com/in/indigo-fobes-b2010123b/>

GitHub: <https://github.com/IndigoFobes>

Portfolio: <https://indigofobes.github.io/indigo-react-portfolio/>

## SUMMARY

Trained in musical theatre performance, recently earned a certificate in Full Stack Web Development from Georgia Tech. Considered by self and peers to be creative, curious, and communicative. Passion for telling stories, connecting with people, and building new things with excellence.

## TECHNICAL SKILLS

JavaScript, HTML, CSS, Node, Express, MongoDB, MySQL, NoSQL, Handlebars, React, Tailwind, GitHub, Third Party APIs

## PROJECTS

### MySQL Employee Manager | Command Line

GitHub: <https://github.com/IndigoFobes/mysql-employee-manager>

This command line application helps business owners/managers manage their company and track new hires/positions. By following the instructions in the command line, a user can boost their organization and improve efficiency in handling company information.

- Role: built solo
- Tools used include JavaScript and Node, along with packages console.table, express.js, inquirer, and mysql2

### Weather Today | GitHub: <https://github.com/IndigoFobes/weather-today-app>

Live: <https://indigofobes.github.io/weather-today-app/develop/>

This application features a search bar that allows users to search for any city and view the current weather, as well as a five-day forecast. The search history feature uses local storage to save the user's previous searches for later viewing.

- Role: built solo
- Tools used include HTML, CSS (custom), JavaScript, Bootstrap, Moment.js, jQuery, and Open Weather Map API

### Al Dente | GitHub: <https://github.com/crhinesmith/alDente>

Live: <https://crhinesmith.github.io/alDente/>

This recipe-search application uses third-party API calls to provide the user with recipe options and local storage to save any recipe for later, if desired.

- Role: front and back end; core responsibilities included homepage search API, autocomplete widget, majority of CSS, README.md, and assistance in overall functionality.
- Tools used include HTML, CSS (custom), JavaScript, Tailwind, Moment.js, jQuery UI, and two third-party APIs: "TheMealDB" and "TheCocktailDB".

## EXPERIENCE

### **Marketing, Graphic Design, Technology Assistance**

November 2022 - present
